

**Hyperdrive Space** is a portable storage device that allows you to backup 18 memory card formats on the go without the need for computers or external power. It possesses many world class features unseen and unrivalled by any product:

#### Product Specifications

Memory Card Slots	3 slots supporting 18 memory card formats CompactFlash CF Type I / Type II / MicroDrive Secure Digital SD / SDHC / MultiMedia Card MMC xD Picture Card / xD Type-M / xD Type-H MemoryStick MS DUO / MS DUO MagicGate / MS PRO DUO MS PRO DUO MagicGate / MS / MS MagicGate / MS Select MS PRO / MS PRO MagicGate
Backup Speed	Max speed: 50MB/s (by Direct Memory Access DMA Technology) Sustained speed: 20MB/s
Computer Interface	USB 2.0 High Speed Mode via Ultra DMA 66 Max speed: 480Mbps Sustained speed: 28MB/s
Battery	Internal battery: Rechargeable 18650 Li-Ion (3.7V, 2,200mAh) External battery: 4 x AA battery pack or 3 x 18650 Li-Ion pack
Battery Performance	Internal Li-Ion battery: 100GB backup at full charge External Li-Ion battery: 300GB backup at full charge
Power	USB bus powered AC power adapter (Input: Universal 100-240V, Output: 5V, 1A) Car charger (12V DC)
Hard Drive	2.5" IDE/PATA ATA-6/ATA-100 Large capacity (over 128GB) HDD supported Multiple partition HDD supported
Copy Verification	Hardware based 32-bit verifier 5 verification modes: full, quick (1:32), 1:3, 1:7, 1:16
LCD Display	1.8" monochrome LCD with blue EL backlight
File System	Hard Drive: FAT32 Memory Card: FAT12/16/32
Operating System	Windows 98SE/ME/2000/XP/VISTA Mac OS 9.x, 10.x & above Linux
Dimension	127 x 73 x 20mm 5" x 2.87" x 0.79"
Weight	152g / 5.3oz (without HDD) 250g / 8.8oz (with HDD & battery)
Standard Accessories	USB cable, AC power adapter, car charger, carrying case, screwdriver, 4 screws, manual
Optional Accessories	External 4 x AA battery pack External Li-Ion battery pack

Standard accessories include *Hyperdrive Space* unit, user manual, carrying case, car charger, USB cable, AC adapter, screwdriver and screws.

**Backup directly from 18 types of memory cards**  
**No computers, adapters, cables required**

HYPERDRIVE SPACE is the only portable storage device to support 18 types of cards, virtually every memory card in the market. HYPERDRIVE SPACE works standalone without the need for computers, card adapters, cables or external power. You can also transfer data from HYPERDRIVE SPACE back to the memory card.

Supports: CF Type I/II, MD, SD, SDHC, MMC, xD, xD Type-M, xD Type-H, MS, MS MagicGate, MS Select, MS PRO, MS PRO MagicGate, MS DUO, MS DUO MagicGate, MS PRO DUO, MS PRO DUO MagicGate

**World's Fastest Card Backup Speed**  
**Backup 1GB in under 1 minute (20MB/s)**

Using DMA (Direct Memory Access) technology, HYPERDRIVE SPACE is able to achieve blazing backup speeds of up to 20MB/s, which translates to 1GB backup in under 1 minute! Backup and reuse your memory card in no time.

**Ultra Fast USB Transfer Speed (28MB/s)**

HYPERDRIVE SPACE functions as an external USB hard drive when connected to your computer. Transfer your photos and data between HYPERDRIVE SPACE and the computer at blazing 28MB/s speed, the fastest in its class.

**Support Large Capacity Multi-Partitioned Hard Drive**  
**40GB to 160GB & beyond**

HYPERDRIVE SPACE comes in various sizes from 40GB to 160GB to suit all backup needs. You can even buy just the HYPERDRIVE SPACE casing and install your own hard drive. HYPERDRIVE SPACE is able to support multiple partitions and future large capacity hard drives beyond 160GB.

**World's Longest Battery Performance**  
**Backup 100GB on a full battery**

HYPERDRIVE SPACE has tremendous battery power to couple with its huge storage Hyperdrive Space. Using the same high capacity rechargeable 18650 Li-Ion cell used to power notebook computers, a single full battery is good for 100GB of downloads, enough to fill up most hard drives. HYPERDRIVE SPACE batteries are easily removable and replaceable.

---

**4 ways to power/recharge HYPERDRIVE SPACE, anywhere in the world**

HYPERDRIVE SPACE internal battery can be recharged via USB, AC adapter, car charger and external battery pack (4 x AA or Li-Ion cell). With the provided universal voltage (100-240V) AC adapter, you can power HYPERDRIVE SPACE anywhere in the world.

---

**32-bit Copy Verification System**  
**Copy & Quick Verify 1GB in 1 minute**

Ensure that all your data is safely transferred and stored on HYPERDRIVE SPACE with hardware-based 32-bit copy verification system that compares the data copied on HYPERDRIVE SPACE with the original data on the memory card to ensure that they are identical. HYPERDRIVE SPACE features 5 verification modes from full to quick (32:1) verification.

---

**Smart Error Handling**  
**Backup a memory card even if it has bad sectors**

Most backup devices (even computers) will fail or hang when it encounters a corrupted memory card. HYPERDRIVE SPACE is intelligent enough to skip these bad sectors and give you the option to backup the rest of the memory card, salvaging the uncorrupted part.

---

**Advanced File Operations**

With HYPERDRIVE SPACE, you can browse files/folders, delete files/folders, format hard drive & memory card, define folder name, check remaining Hyperdrive Space, check/upgrade firmware version, restore to factory settings.

---

**Copy Time Stamping**

HYPERDRIVE SPACE features a built-in clock that shows the date & time and keeps track of when every backup is performed.

---

### Supports Fragmented Hard Drive Hyperdrive Space

Any hard drive will become fragmented as you copy and remove data over time. Most backup devices will not be able to use this fragmented Hyperdrive Space and may run out of Hyperdrive Space prematurely even when the hard drive is not full. HYPERDRIVE SPACE on the other hand is intelligent enough to use every single hard drive Hyperdrive Space, fragmented or otherwise, giving you all the memory Hyperdrive Space you need.

Unlimited Storage *Hyperdrive Space* For All Your Photos:

Free up space for more shots by easily backing up your full memory card to the *HyperDrive Space* (no computers required). It is so fast, you hardly notice the wait and because it is powered by rechargeable li-ion batteries, you can carry it where ever you go. With long lasting battery life and storage capacities as huge as your computer, you are set for unlimited shooting with the only memory storage that you will ever need.
